Everyone does things slightly differently which
leads to incomparable results. If we all just
pip install iobes
we will all do the same thing and compare apples
to apples.

Illegal transition, this I- doesn't follow a label of the same type.

Person("Jack White")
Location("Detroit")
Date("July 9th 1975")

Follow the prefix?
Person("Jack White")
Location("Detroit")
Date("July 9th 1975")

Follow the labels?
Person("Jack White")
Location("Detroit")
Date("July")
Number("9th")
Date("1975")
